### New Approaches for Immunotherapy

With recent FDA approvals, CAR T-cell and other immunotherapy modalities, including different types of agents and checkpoint inhibitors, are starting to establish firm footing within the oncology space. As the field matures, new approaches have begun to emerge to expand the use of immunotherapy, modulate its toxic side effects, and reduce its cost. Join us to learn how Greater Los Angeles bioscience companies push the immunotherapy field forward to provide patients with cheaper and better therapy options.

### About the SoCalBio Networking Forum

The SoCalBio Networking Forum is produced by the Southern California Biomedical Council (SoCalBio), the trade association of the biotech, MedTech, and digital health industries in the Greater Los Angeles Region. This forum brings together leaders from all segments of the life-science industry to share insights and learn about:

- Innovation best practices
- Device and biotech business trends
- Technology convergence opportunities, and
- Broad-reaching public policies shaping the commercialization of innovations and healthcare service delivery in the U.S. and abroad.
