

Clinical Project Manager - Alfred Mann Foundation

The Alfred Mann Foundation values its employees and offers a 9 - 80 work schedule. You will be off every other Friday!

The **Clinical Project Manager** plays an essential role in the development and implementation of clinical research projects by managing the clinical operations activities of assigned studies.

The key elements are:

- Pre-clinical experience
- Monitoring and Audit experience
- Experienced in applying for grants or supporting grant efforts
- Proficiency in Excel, Power Point, Word, and statistical analysis. (MATLAB a plus)
- Knowledgeable in compliance maintenance with all local, state and federal requirements

Should have:

- 5 to 8 years experience in medical device clinical trial management
- BS or MS in life sciences, nursing, engineering or a related field.
